

# PLAY SAFELY, HAVE FUN, AND BE KIND.

Help protect your family and neighborhood from COVID-19:

## Wash hands...

- after playing
- before and after eating a snack
- when you return home

No soap and water? Use hand sanitizer or antibacterial wipes.

## Keep 6 feet apart when possible.

More space between you and other people means less risk of getting sick.

## Wear a cloth face covering...

- while talking with neighbors
- when children (over age 2) are done being active
- when walking home as a group

Do not wear face coverings when playing, running, or climbing.

## Stay home when you are sick.
